## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see page 6, paragraph 5 to page 7, filed 03 February 2005, with respect to claims 1 and 2 have been fully considered and are persuasive. The previous rejection of the claims has been withdrawn.

### ***Allowable Subject Matter***

2. Claims 1, 3-10 and 15-18 are allowed over the Prior Art of record.
3. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of the claims is the inclusion of a leak detector for connection to an air supply, the leak detector being adapted to deliver vapour under pressure to a system for detecting leaks in the system including a housing with first and second openings, a tank defining a fluid chamber within a chamber for holding a quantity of fluid, the tank having an inlet and outlet; a first conduit for delivering air from the air supply having first and second ends, the second end received through the first opening of the chamber through the inlet of the fluid chamber for delivering air from the air supply, the second end of the first conduit being positioned in the fluid tank to direct air against the fluid whereby vapour is generated in the tank by contact of air against the fluid; a second conduit having first and second ends located in the chamber for delivering the vapour from the fluid chamber to the system, the second conduit received through the second opening of the housing for connection to the system. The closest reasonable Prior Art reference that generates a vapour (i.e. smoke, fog, mist, visible particulates entrained in air) is

Art Unit: 2856

US 4,836,452 to Fox (see Fig. 5 below), which generates artificial smoke/vapour/fog/mist via conduits and openings by forcing air against a vapour generating fluid, however, there is no combination of a "system" for testing leaks, or employing the device as a leak detector.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
